

Amendments to the Claims

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-6. (Canceled)

7. (Currently Amended) A child seat having radio-based identification, the child seat comprising:

at least one radio-identification chip configured as a transmitter module and situated in the child seat, the at least one radio-identification chip having a specific identifier for transmission via a radio signal, wherein the at least one radio-identification chip is woven into fabrics used for the child seat; and

a thermogenerator for supplying the at least one radio-identification chip with electrical energy.

8. (Canceled)

9. (Currently Amended) A method for detecting a child seat, the method comprising:

supplying by a thermogenerator an electrical energy to a radio-identification chip; and

detecting the child seat with the aid of a radio signal produced by the radio-identification chip that is automatically transmitted from the child seat.

10. (Previously Presented) The method according to claim 9, wherein the radio signal is emitted on a permanent basis.

11. (Previously Presented) The method according to claim 9, wherein a seat-pressure profile is additionally utilized for child-seat detection.

12. (Previously Presented) The method according to claim 9, wherein an optical identification system is additionally utilized for child-seat detection.
